MATERIAL SPECIFICATIONS

**USE GUIDELINES**

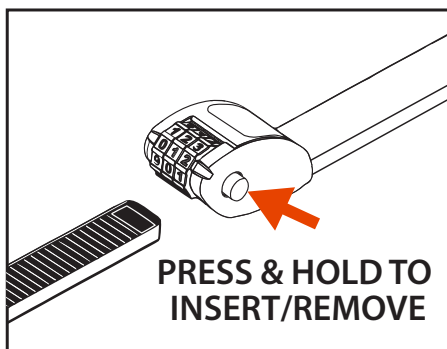

The design intent of OTTOLOCK is to provide a lightweight, compact, easy-to-carry solution to prevent opportunistic theft during quick stops like getting coffee, snacks, or restroom breaks. All bike locks can be defeated by a motivated thief with proper tools, technique, and time. OTTOLOCK provides an appropriate “quick stop” level of defense against many forms of attack – not any and all tools.

	OUTER COIL DIAMETER	SIZE SELECTION
18"	3.0"	Locks single tube to small post or pole.
30"	3.5"	Locks frame and wheel to small post or pole, or two bikes together
60"	4.0"	Locks both wheels and frame to small post or pole. Also for several bikes and car/truck racks
