#### **Notes:**

1) Zamberlan's US dealers should not rely on Zamberlan EU sizing information as the Zamberlan brand sizes differently from other European brands. Instead, US dealers should rely on Zamberlan USA's conversions to US sizes as these have proven to be highly accurate over time.

2) Some people have found that Zamberlan US sizing tends run 1/4 size longer than what they are accustomed to. For example, if someone typically wears a size 9H, they may find that a Zamberlan US size 9 is a better fit.
